Quiz Instructions

Watch the following video and answer questions

[Watch the video \(also on youtube\)](https://bigthink.com/videos/universe-in-a-nutshell-the-physics-of-everything-with-michio-kaku/)  (<https://bigthink.com/videos/universe-in-a-nutshell-the-physics-of-everything-with-michio-kaku/>)

Question 1 6.25 pts

If I drop a book and a paper from the same height on the Moon
(no atmosphere = no air resistance) :

☐

The paper reaches first

☐

They both reach the Gnd at the same time

☐

The book reaches first

☐

It depends on the height.

Question 2 6.25 pts

who developed general relativity

☐

Isaac Newton

☐

Michael Faraday

☐

Albert Einstein

☐

James Maxwell

Question 3 6.25 pts

The scientist who figured out how to produce (alternating) electricity using magnetism

☐

Isaac Newton

Michael Faraday

James Joule

Galileo Galilei

Question 4 6.25 pts

The scientist who developed the universal law of gravitation

Galileo Galilei

Isaac Newton

Michael Faraday

Aristotle

Question 5 6.25 pts

Is the Moon falling toward the Earth (according to scientist from Q4):

The Moon does not fall. Its not a gieant apple

I didn't watch the video

no because gravity can not reach out the Moon

yes but never reaches the EArth because of its initial velocity

Question 6 6.25 pts

Following Q4. The Moon is in _____ fall

free

hyperbolic

orbital

parabolic

Question 7 6.25 pts

The scientist who is credited for calculus is:

☐

Michael Faraday

☐

James Hook

☐

Isaac Newton

☐

James Maxwell

Question 8 6.25 pts

Comets are moving at a perfect:

☐

exponential

☐

ellipse

☐

parabola

☐

straight line

Question 9 6.25 pts

Newton wrote the most important book in Physics called

☐

Newton's law

☐

principia

☐

Law of universal gravitation

☐

Classical mechanics

Question 10 6.25 pts

Today to launch a space probe you use:

☐

space exploration is a hoax

☐

Newton's law

☐

Einstein's relativity

☐

Maxwell's equations

Question 11 6.25 pts

During a thunderstorm you will be protected from lightning in your car. Such a structure is called a

☐

Einstein's box

☐

Newton's safe

☐

worm hole

☐

Faraday's cage

**Question 12 6.25 pts**

Maxwell's equations show that

☐

The fabric of space is curves by masses

☐

electromagnetic waves move at the speed of light

☐

force is mass times acceleration

☐

regardless of their mass, all object move at the same rate

**Question 13 6.25 pts**

According to special relativity the faster you run the _____ you get.

☐

heavier

☐

hotter

☐

IDK

☐

cooler

**Question 14 6.25 pts**

A short cut through time and space is called:

☐

A short circuit

☐

quantum tunnel

☐

a black hole

a worm hole

Question 15 6.25 pts

The universe is expanding. So it is getting

it is not expanding

warmer

the universe is collapsing under gravity

cooler

Question 16 6.25 pts

The universe is mostly made of: (95%)

simple matter like planets, stars, gas, BH

green iguana

worm holes

dark energy and dark matter
